

# HEPAROT

SILYMARIN  
HEPATOPROTECTIVE

## 1. PHARMACEUTICAL FORM

Oral solution

## 2. COMPOSITION

**Each 100 mL contains:**

Silymarin 4,00 g  
Excipient q.s. 100 mL

## 3. SPECIES

Canines  
Felines  
Poultry

## 4. PHARMACOLOGICAL ACTION

Silymarin is a powerful antioxidant that neutralizes free oxygen radicals, which oxidize and damage liver cells exposed to toxins. It is at least ten times more powerful as an antioxidant than vitamin E.

## 5. INDICATIONS:

It is indicated in various hepatic affections, of pathological type where there is a compromised hepatocyte, as intoxications by different substances, certain antibiotics, cirrhosis; and for its protective action against the aflatoxins.

## 6. PHARMACOKINETICS

Silymarin metabolism is hepatic.

## 7. CONTRAINDICATIONS

Known hypersensitivity to any of the components.

## 8. ANTIDOTE

There is no specific antidote, treatment is purely symptomatic.

## 9. WARNINGS

Not recommended to use in other unauthorized species.

## 10. INCOMPATIBILITIES

There are no drug interactions.

## 11. SIDE EFFECTS

They have not been determined.

## 12. DOSAGE AND MODE OF ADMINISTRATION

| DOSAGE                                                                                                                                                              |                |                                                 |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|-------------------------------------------------|
| Species                                                                                                                                                             | Reference Dose | HEPAROT dosage                                  |
| <br>Poultry                                                                        | 200 ppm        | Add 5mL of Heparot per liter of drinking water. |
| <br>Canines<br>Felines                                                            | 15 mg/kg       | 1mL of HEPAROT per 3Kg liveweight once day.     |
| <b>Route of administration:</b> Oral. The duration of treatment, dosage and frequency of administration of the product may be modified at the veterinary discretion |                |                                                 |

## 13. WITHDRAWAL

Do not apply

## 14. STORAGE

Store in a fresh and dry place, protected from light at a temperature between

15°C to 30°C.

**Keep out of the reach of children and pets.**

## 15. SALE

Under veterinary prescription only.
